DETAILED ACTION

1. This action is in response to Applicant's Election, in response to the Election/Restriction requirement set forth in the March 08, 2006, filed on April 10, 2006.

2. Applicant elected Group II, claim 41, with traverse.

However, the restriction was proper. Because the inventions are distinct, each from the other because of the following reasons:

The applicant's the ground(s) of the traversal, is not found persuasive. Because one application should have one invention and examining different invention on one application is burden. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instance case, invention I can be used for obtaining data from a network of computers, applying text patterns to the obtained data and placing the data in a first data file, providing a second data file containing the text patterns in a transformed uniform and semantically structured data structure format, generating grammatical sentences from the data in the data structure according to a specific canonical interface in the second data file, which is manipulating data structure. Invention II can be used for using a user interface having a voice portal to obtain data from a network of computers, step of using a user interface having a voice portal to obtain data comprises sending voice command to the network of computers, user

Art Unit: 2166

interface comprises at least one of the steps of: identifying the user with a phone number, starting a new session for the user, adding a new interaction, updating a preference of the user within a domain, enabling the preference of the user within the domain, disabling the preference of the user within the domain updating an expertise level of the user, updating personal information of the user; updating session state of the user, adding credit card information of the user, updating the credit card information of the user, which is manipulating and using graphical user interface. See MPEP 806.05(d).

3. Claim 41 is elected and presented for examination for this action (claims 1-40 and 42 are non-elected and withdrawn for this office action).

Claim Objections

4. Claim 41 is objected to because of the following informalities:
“the steps of:” in line 2 and 6 of claim 41, should be – steps of: –;
“the data” in line 18, should be -- the obtained data –;
Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 41 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 41 recites the limitation "said user" in line 7. There is insufficient antecedent basis for this limitation in the claim. Claim 41 recites the limitation "the data" in line 22. It is unclear what "the data" refers to.

Allowable Subject Matter

7. Claim 41 is allowed.

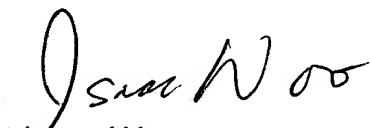

Claim 41 identifies the distinct feature that user interface having a voice portal to obtain data comprises sending voice command to the network of computers, identifying the user with a phone number, starting a new session for the user, adding a new interaction, updating a preference of the user within a domain, enabling the preference of the user within the domain, disabling the preference of the user within the domain, updating an expertise level of the user, updating personal information of the user, updating session state of the user, adding credit card information of the user, and updating the credit card information of the user. The prior art fails to suggest the claimed limitations as mentioned above in combination with other claimed elements.
